Experience

WorkSpan, Remote
Sr. Director, Product Led Growth & AI GTM 09/2026 – Present

- Launched Playmaker, WorkSpan's new AI product for the product-led growth market, on 10/24/2026, within 11 weeks of joining. This opened a new self-serve revenue line with a target of $1M ARR by January 2027.
- Designed and deployed a 100-step lifecycle email journey that personalizes each touch based on user behavior. It moves Playmaker users from signup through activation to paid conversion, and it went live within my first 90 days.
- Built a unified semantic layer that standardizes critical lifecycle definitions, giving marketing, product, and sales one source of truth for funnel, segmentation, and free-to-paid conversion metrics.
- Built the AI-native PLG stack from the ground up in under one quarter, combining behavior-driven journeys, governed lifecycle data, and real-time reporting into one growth system.

ZoomInfo, Remote
Principal Product Manager, Growth & E-Commerce 11/2025– 09/2026

- Launched a true month-to-month digital subscription tier to capture downmarket demand, opening a new revenue channel and enabling sellers to run groundswell plays and expand from single B2C signups into larger B2B sales based on usage and product engagement. This offering decreased monthly SMB writeoffs by 40% in the first quarter.
- Built a full-funnel product analytics framework and embedded internal AI chatbots that let sales self-serve customer journey and engagement insights, removing the analyst bottleneck on pipeline and account questions.
- Re-architected provisioning, identity management, and commerce as idempotent microservices, eliminating dependencies on Salesforce and other non-product systems to make customer onboarding self-contained, faster, and resilient to upstream failures.
- Partnered with Customer Success and Support to deploy AI-driven support flows resolving 80%+ of inbound cases (including cancellations and upsells), recovering hundreds of agent hours per month and shifting headcount toward higher-value retention work.

Boomi LP, Remote
Director, Growth & Customer Lifecycle 10/2023 – 07/2025

- Led a cross functional team of 15 to deliver high-quality experiences across the platform focused on user lifecycle.
- Defined and reported primary KPIs for the full user lifecycle, from onboarding, adoption, and expansion.
- Owned trial experience and in-product marketing and adoption campaigns that generated $25M in pipeline and $4M ARR from self-serve and free to paid conversions, and $30M in pipeline of expansion opportunities.
- Established a structured experimentation framework for onboarding experiences and in-product upsell, driving a 4% increase in trial-to-paid conversions, and just-in-time sales outreach through Marketo, Pendo, and Twilio Segment.
- Optimized digital lifecycle touchpoints including landing pages, onboarding flows, and product documentation, boosting organic acquisition and customer engagement.
- Translated customer and sales feedback into messaging insights for content, onboarding flows, and feature announcements tailored individually to ICPs, decision makers, and line of business users.

Boomi LP, Remote
Sr. Manager, Product Led Growth Operations 01/2021 – 10/2023

- Managed a 6-person team across sales operations, analytics, and content to scale product-led growth and lifecycle initiatives.
- Designed routing and handling for Product Qualified Leads, accelerating progression from trial to adoption and expansion stages.
- Implemented Pendo and integrated behavioral analytics into Salesforce, Marketo, and Twilio Segment to enable lifecycle visibility and data-driven engagement.
- Built behavior-based workflows for sales and customer success outreach, reducing churn by 10%, increasing trial conversion by 8%, and supporting expansion opportunities.
